

INTERNATIONAL MARKETING, INC. TECHNICAL BULLETIN

SUBJECTS: Use of EQUAL Automotive Formula in Tires Containing Liquid or Gel Substances

Use of EQUAL Automotive Formula in Puncture Resistant Tires

DATE: September 12, 2000

EQUAL Tire Performance Automotive Formula should not be installed into tires containing liquid or gel-like substances. This includes tire sealants or like materials.

All liquid or gel-like materials should be thoroughly cleaned out of the passenger tire cavity before the installation of EQUAL Automotive.

International Marketing, Inc. does not recommend the use of EQUAL Tire Performance in tires which are puncture resistant due to the coating which is found on the inner liner of the tire.
