THE USE OF BALANCING COMPOUNDS IN MICHELIN® TRUCK TIRES

The use of balancing compounds (powder, liquids and/or gels) in Michelin® Truck Tires does not automatically nullify the warranty agreement covering the tires. If it is determined that the compound adversely affected the inner liner and/or the performance of the tire then the warranty agreement may be nullified.

Please check with Michelin prior to using these compounds in any Michelin tires that have sensors in them. The compound may adversely affect the performance of the sensors.

Please refer to the Michelin Truck Tire Warranty Manual for what is and is not covered by the warranty.

If you have any questions please contact Michelin at www.michelintruck.com.
